## **DETAILED ACTION**

### **ALLOWANCE**

1. Claims 1-3, 6, 7, and 9-20 were previously pending as per the previous office action.
2. Claims 1-3, 6, 7, and 9-15 were previously indicated as being allowable.
3. Claim 16 has been amended to include the previously allowable subject matter contained in the currently cancelled claims 4, 5, and 8
4. Claims 1-3, 6, 7, and 9-20 are allowed.

### **REASONS FOR ALLOWANCE**

#### **Prior art was found which disclosed:**

In a signaling network in which signaling messages are communicated between signaling points of the signaling network, an improvement of apparatus for selectably encoding at least portions of a signaling message communicated by way of a first selected signal point to at least a second selected signal point, said apparatus comprising:

an encryption selector operable responsive to delivery of the signaling message at the first selected signal point, said encryption selector for selecting which, if any, portion of the signaling message to encrypt; and

an encryptor adapted to receive indications of the signaling message and to receive indications of selection made by said encryption selector, said encryptor selectably for encrypting the portion of the signaling message selected by said encryption selector to be encrypted, the signaling message thereafter to be forwarded on to the second selected signaling point.

(e.g. Johnson, US patent no. 5974052, Blanchard, US patent no. 6081600, and Kollmyer, US patent no. 7165175)

**The following is an examiner's statement of reasons for allowance:**

The prior art of record does not teach or render obvious the limitations as recited in dependent claims 4, 5, and 8 of the previously submitted claims, specific to

*wherein the signaling message is originated by an originating node and wherein the index maintained by said encryption selection database comprises indicia associated with the originating node indexed together with values representative of which, if any, portion of the signaling message is to be encrypted.*

*&*

*wherein the second selected signal point to which the signaling message is to be forwarded is identified by an identifier and wherein the index maintained by said encryption selection database comprises indicia associated with the identifier indexed together with values representative of which, if any, portion of the signaling message are to be encrypted.*

*&*

*wherein the payload part of the message signaling unit forming the signaling message that said encryptor selectably encrypts comprises at least a selected one of an MTP3 part and an AP part, and wherein said encryption selector selects, if any, at least one of the MTP3 part and the AP part of the message signaling unit*

5. *Applicant's amendments of the independent claims 1 and 16 to include the above subject matter of claim 4, 5, and 8 render said independent claims allowable.*
6. *Claims 2, 3, 6, 7, 9-15, and 17-20 depend on independent claims 1 and 16 respectively. Dependent claims are allowable as they depend from an allowable independent claim.*
7. *Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".*
